DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

Claims 1 and 5 stand rejected under 35 U.S.C. 102(e) as being anticipated by Gestermann of record for reasons of record.

Claim Rejections - 35 USC § 103

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gestermann as applied to claims above, and further in view of Bulan of record for reasons of record.

Claims 3-4 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Gestermann as applied to claims above, and further in view of Sakata of record for reasons of record.

Double Patenting

Claim 1 stands rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 8 of U.S. Patent No. 6,383,349 in view of Gestermann of record for reasons of record.

Claim 1 stands rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 10-18 of U.S. Patent No. 6,372,102 in view of *Gestermann* of record for reasons of record.

Response to Arguments

Applicant's arguments filed 12/31/07 have been fully considered but they are not persuasive.

Applicants argue that since there is no disclosure of an electro-conductive path for discharging the back plate and the connecting pieces there is no basis for concluding that current is discharged from the electrode in the *Gestermann* patent.

In *Gestermann* the back wall, the current collector and the frame together form the electrode chamber (see col. 4, lines 57-62). The materials are selected to be resistant material, such as titanium (see col. 3, lines 9-12). Further it appears that the use of conductive materials, such as titanium in the back wall would inherently cause the current discharge, since it appears that the contact between the electrode and the conductive wall causes the discharge.

Therefore, the Gestermann patent would anticipate the claimed subject matter and would further provide the teachings to reject the other claims based on 103 and double patenting.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
